MICHELL OFFERS THESE TWELVE VARIETIES OF TULIPS

SPECIAL NOTICE

Due to the unsettled conditions in Europe, reliable information in regard to the bulb situation is not available, which is the reason for not issuing our large illustrated catalog for Fall 1940. At the time this folder goes to press (August 15) there is a great uncertainty regarding the possibility of shipping Holland bulbs to this country. We have made provisions to procure a limited quantity of the leading varieties of Tulips GROWN IN THE UNITED STATES which are offered on this page. In the event of Holland-grown bulbs arriving in this country, our customers will receive a special list enumerating the varieties that will be available.

MICHELL'S AMERICAN-GROWN NARCISSUS

No garden is complete without the Narcissus or Daffodil, it being among the most beautiful and fragrant of our hardy spring-flowering bulbs, doing well in almost all soils and situations, for naturalizing, planting among shrubbery and in informal beds. For house or greenhouse culture they are equally desirable, planted in pots or pans.

Cultural Directions. Owing to the various sizes of the bulbs of different varieties, we cannot give the exact depth to plant, but a good rule to follow is to cover the bulb one and one-half

times its own depth. For house culture, 3 or 4 bulbs can be put in a 5-inch or 6-inch pan or pot and given the same treatment as hyacinths.

The letter following the name indicates their relative time of flowering, the A's being the earliest to bloom, followed by B's, and the C's the latest. The figures denote the height in inches.

If Narcissus bulbs are wanted by Parcel Post, add 30c per 100 for postage to the First and Second zones; for other zones, please add additional postage.

POLYANTHUS NARCISSUS

Bunch-flowering

This class of Narcissus is suitable for indoor planting only, except south of the Carolinas. We list the best two varieties of this type, which are grown especially for us, and the bulbs we have been supplying have been giving the best results. These bulbs can be grown successfully in soil as well as in pebbles and water, and can be had in bloom from Thanksgiving to Easter. Store your bulbs in a cool, dry place when received, and for a succession of bloom, plant at intervals of about two weeks from October 1 to March 1.

The flowers are produced in clusters and are delightfully fragrant.

MICHELL'S BIG BLOOM PAPER-WHITE

This pure white-flowering sort is used extensively for forcing, as it can be brought into bloom in 8 weeks' time. Easily grown in pebbles and water.

AUTUMN IS IDEAL TIME FOR LAWN WORK

ONE can make a new lawn or rebuild an old one at any time—except during a northern winter. During autumn the new grass does not have to compete with weeds, fall rains furnish a great deal of the water necessary to give the grass a real start, and the new grass will stool out and spread into a good thick turf quicker and better than at any other time of the year.

Seed may be sown successfully as late as October 15 in the latitude of Philadelphia, but we recommend September sowing for best results.

September seeding on well-prepared soil will produce a turf that can stand severe freezing and will be heavy enough to smother any weeds that try to break through in spring.

Quantity to Sow for Lawns. We recommend sowing 1 quart to 100 square feet; 1 peck to 1000 square feet; 1 bushel to 4000 square feet; 6 to 8 bushels per acre on new ground without grass. In renovating established lawns, use half the above quantities.

Send for our booklet "Lawn Pointers" for further suggestions.

On account of market fluctuations on many varieties of grass seeds, prices on larger quantities than those named will be quoted on request.

MICHELL'S FAMOUS GREEN VELVET LAWN SEED

For an open lawn where a closely knit turf of lustrous green with a velvety appearance is desired for a reasonable price, this mixture is unsurpassed. It is a thoroughly tested combination of hardy grasses ideally suited for fine permanent lawns.

A "Green Velvet" lawn is not only able to withstand really cold winters but tough enough to stand up under rough usage and still retain its fine appearance.
